

Project Demo Planning

Date	12 August, 2026
Team ID	Individual
Project Name	AI Knowledge Retention Predictor
Maximum Marks	1 Mark

Project Demo Planning

A well structured demo plan ensures that the individual presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each Individual.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1.	Introduction & Problem Statement	Introduce the problem of memory decay, Ebbinghaus's Forgetting Curve, and the core objective of predicting knowledge retention.	2 mins	Individual (Self)
2.	Architecture & Tech Stack	Briefly explain the system workflow combining Python (<code>utils.py</code>), SQLite storage, Google Gemini API, and Streamlit.	2 mins	Individual (Self)
3.	Live Feature Demo: Memory Decay & DB	Demonstrate study topic input, real-time decay curve rendering, and persistent review	3 mins	Individual (Self)

		logging inside SQLite.		
4.	Live Feature Demo: AI Quiz & Score Sync	Trigger live AI quiz generation using Google Gemini API, complete the quiz, and showcase instant retention score updates.	3 mins	Individual (Self)
5.	Cloud Deployment & Project Setup	Showcase the live web app hosted on Streamlit Cloud and the organized GitHub repository structure.	2 mins	Individual (Self)
6.	Conclusion & Q&A	Summarize key project achievements, discuss potential future extensions, and take questions from evaluators.	3 mins	Individual (Self)

Demo Flow Summary

Step	Activity	Notes
1.	Introduction & Problem Statement	Hook the evaluators with the "Forgetting Curve" concept; state how traditional review tools lack personalized memory timing.
2.	Solution Overview	Outline how your mathematical algorithm computes decay and triggers dynamic Google Gemini quizzes to optimize review schedules.
3.	Live Feature Demonstration	Walk through your deployed Streamlit app in real-time, showcasing decay graphs, AI quiz generation, and automatic database updates.
4.	Q&A Session	Answer evaluator questions

		regarding Gemini API integration, prompt engineering, formula precision, and SQLite schema design.
