Maximum Marks	4 Marks

Empathy Map

PERSONA NAME (Role/User Type)

SAYS • I studied this topic last week, but I can't remember the key details today. • I need a smarter way to schedule my revisions before exam week hits. • Standard static quizzes feel like a waste of time because they don't test what I've actually forgotten.	THINKS • Is my memory really this bad, or am I just studying inefficiently? • I wish I had a tool that could accurately predict when I'm about to forget a concept. • Active recall testing would save me so much time compared to re-reading textbook notes.
DOES • Re-reads syllabus notes multiple times right before exams. • Tracks revision dates manually on calendar apps or notebooks. • Searches for online quizzes to test knowledge on complex topics like Data Structures.	FEELS • Anxious about unexpected questions on previously studied topics. • Frustrated by the continuous cycle of learning and forgetting. • Motivated when presented with clear visual progress and analytics
