Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1: Discovery & Onboarding	Stage 2: Daily Learning & Knowledge Testing	Stage 3: Retention Tracking & Revision
Actions (What does the customer do?)	• Searches for smart revision tools online. • Signs up on the platform and creates a user profile. • Selects target study subjects and inputs initial learning schedule.	• Completes daily AI-generated adaptive quizzes. • Inputs confidence levels after completing topic reviews. • Reviews instant feedback on practice assessment results.	• Checks retention decay curves and score predictions. • Follows system-recommended revision schedules. • Tracks long-term mastery across subject modules.
Touchpoint (What part of the service do they interact with?)	• Web App Landing Page. • Registration & Onboarding Form. • Subject Selection Dashboard.	• Interactive Quiz Interface. • Real-time Gemini API Prompt Generator. • Instant Assessment	• Visual Knowledge Retention Analytics Chart. • Revision Calendar & Smart Notification

		Result Panel.	Feed. Progress Overview Report.
Customer Thought (What is the customer thinking?)	- Will this actually save me revision time before exam week? - How easy is it to set up my study subjects? - Is this tool tailored to my specific curriculum?	- Are these questions accurately targeting what I am about to forget? - This instant feedback helps me see my weak spots quickly. - I hope the quiz length stays manageable.	- I feel much more prepared seeing my retention score increase. - The predicted revision alerts prevent me from cramming last minute. - My study plan feels much more organized now.
Customer Feeling (What is the customer feeling?) Process Ownership (Who is in the lead on this?) Opportunities (How can we improve this stage?)	- Curious and hopeful, but cautious about setting up another tool. - Product & Marketing Lead / Frontend UI Team - Add 1-click syllabus import (PDF/notes text parser). - Implement a quick interactive product walkthrough.	- Engaged, challenged, and motivated by adaptive testing. - AI/ML Engineering Lead (Gemini API & Quiz Engine) - Dynamically adjust question difficulty based on real-time accuracy. - Support custom flashcards	- Confident, relieved, and in control of exam readiness. - Data Analytics & Algorithm Lead (Retention Predictor Engine) - Send push/email alerts when retention probability drops below 60%. - Add gamified streak rewards to

	Streamline account creation using social logins.	alongside multiple-choice questions. Provide short AI-generated explanations for incorrect answers.	keep daily study momentum high. Enable PDF summary exports for quick offline reviews.
